Education

Cornell University Sibley School of Mechanical and Aerospace Engineering **Ithaca, NY**
Bachelor of Science in Mechanical Engineering with Business Minor for Engineers || GPA: 3.708 Class of 2028

University of Michigan Professional Education – AI for Engineers Certificate **Summer 2026**

Relevant Courses: Engineering Dynamics, Fluid Dynamics*, System Dynamics*, Statics & Mechanics of Solids, Thermodynamics, Differential Equations, Nanotechnology Intro, Engineering Materials Mechanics* (*Currently Enrolled)

Professional Experience

Engineering Intern; *Pennsylvania Department of Transportation (PennDOT)*; Lancaster, PA **May 2026 - August 2026**

- Inspected the SR 222/SR 30 interchange, a one-mile 4-to-6-lane highway expansion with ramp and bridge reconstruction, referencing PennDOT Publication 408 to document daily contractor operations and quantities through PSAs.
- Reported field observations and construction progress daily to senior inspectors and project managers, maintaining accurate PennDOT records across active work sites.
- Monitored bridge-deck reinforcement, concrete placement and finishing, and sound-barrier installation while observing material quality testing, including concrete cylinder compressive-strength tests.

STEM Learning Facilitator (Volunteer); *Lancaster Science Factory*; Lancaster, PA **June 2020 - Present**

- Contributed 150+ volunteer hours supporting hands-on STEM exhibits and youth programming, assisting elementary-age visitors with interactive activities involving mechanics, structures, energy, and motion.
- Troubleshot and maintained interactive exhibits, including electrical controls and water-flow systems, while independently supporting daily floor operations, Makerspace activities, and summer science programs.

Project Experience

Mechanical Design Project; *Cornell University Introduction to Mechanical Design*; Ithaca, NY **Spring 2026**

- Collaborated with a five-person team and agricultural clients to design a spotted lanternfly egg-removal device, progressing from sketches and cardboard models to CAD, 3D-printed parts, and a functional prototype.
- Tracked costs using McMaster-Carr and a budget calculator; tested mechanical performance and ergonomics, finishing 39.6% under budget and earning Best Prototype Design honors as one of 6 teams selected from ~30.

Business & Feasibility Research Contributor; *Cornell Hyperloop*; Ithaca, NY **February 2026 - May 2026**

- Developed a three-phase kinematic model for a proposed 575-km European Hyperloop corridor, evaluating published 700–1,200 km/h operating scenarios and estimating ~30–50 minute travel times.
- Co-authored a feasibility study analyzing lifecycle emissions and infrastructure costs, estimating €17.2–24.3B in capital costs and benchmarking Hyperloop against rail and aviation.
- Collaborated with business and magnetics leads to assess route, speed, and energy assumptions, translating engineering feedback and published data into a study submitted to European Hyperloop Week 2026.

Sports & Leadership Experience

Cornell University Varsity Soccer Team (NCAA Division 1) **August 2024 - Present**

- Commit 20+ hours weekly to Division I training, competition, lifts, and responsibilities while balancing a mechanical engineering course load and contributing to consecutive 2024 and 2025 NCAA Tournament Second Round appearances.
- Selected as one of two juniors for Cornell's Leaders 2 Leaders initiative, collaborating with ~40 varsity athletes on communication and leadership; recipient of the John Penniman Award for excellence in personal discipline and character.

Athletes in Cornell Engineering (Founder – In Development) **August 2026 - Present**

- Spearheading development of a cross-sport network for ~150 engineering student-athletes, engaging athletic advisors and engineers to address academic and scheduling challenges of balancing NCAA athletics with engineering coursework.
- Developing a peer-mentorship platform connecting underclassmen with experienced engineering student-athletes to share course and professor insights, athletic-compatible scheduling, academic resources, and future alumni connections.

Adaptive Sports Mentor (Volunteer); *TOPSoccer Program*; Lancaster, PA **June 2020 - August 2025**

- Mentored 30+ children with physical and developmental disabilities across 50+ volunteer hours, adapting soccer activities to individual abilities, interests, and comfort levels.
- Coordinated with parents, participants, and 15+ volunteers to tailor activities and mentor newer volunteers in providing patient, inclusive one-on-one support.

Technical Skills: **Programming** - Python, Java, MATLAB **|| CAD & Fabrication** - 3D Printing, Autodesk Fusion 360, Cornell Machine Shop Qualified (Manual Lathe, Mill, Bandsaw) || **Lab & Analysis** - Excel, STM, AFM
